Lithium Pharmacology. No one is quite sure how lithium works to exert its therapeutic effects. It is suspected lithium works, at least in part, by: Have you ever wondered how antibiotics help you recover from bacterial infections? It's not magic, it's an actual process. This lesson goes over several examples of some of the pharmacology behind ... The urinary system consists of two kidneys, two ureters, a urinary bladder, and a urethra. The kidneys alone perform the functions just described and manufacture urine in the process, while the other organs of the urinary system provide temporary storage reservoirs for urine or serve as ... ATI Testing is an assessment tool that nursing programs use to identify the strengths as weaknesses of their students so that they can eventually take the NCLEX examinations.. The NCLEX examinations are important to nurses because if they meet success of these examinations, they receive their licenses to become nurses.
