Page 1. INSTRUCTION MANUAL MODE D'EMPLOI MANUAL DE INSTRUCCIONES... Page 4. Thank you for purchasing a Canon product. The Canon Speedlite 270EX II is a compact flash unit for Canon EOS cameras, and works with the E-TTL II and E-TTL autoflash systems. Metering systems. Canon has introduced several different metering systems for its flash products: A-TTL, E-TTL, and E-TTL II. Each system represents different approaches to achieving the proper flash exposure. I got two of these units due to an order mix-up, returning one. These speedlites are indeed the best pals for beginners and hobbyist and have advance features that'll keep hobbyist like me busy for some time. Unlike some other people I have had no problems with my 600EX II-RT. I have used it a few times a month on average for the past year often shooting thousands of shots with it in the span of a couple hours and honestly haven't had a single hiccup in all that time.
