Hampton Bay Low Voltage Watt Landscape Transformer is use with standard household plugs and compatible low voltage lights.Improve efficiency, reduce hum and consume less load power by using this Hampton Bay Low Voltage Watt Landscape Transformer.This is the most common type of transformer, widely used in electric power transmission and appliances to convert mains voltage to low voltage to power electronic devices.A transformer is a static electrical device that transfers electrical energy between two or more circuits.A varying current in one coil of the transformer produces a varying magnetic flux, which, in turn, induces a varying electromotive force across a second coil wound around the same core. Electrical energy can be transferred between the two coils, without a metallic connection between the ...
